SUMMARY

I am currently a student at Bina Nusantara University, and I am deeply interested in Computer Science, that began during my vocational high school years, where I specialized in Software Engineering. Alongside this, I have a strong interest in Big Data, gaining experience in various stages of the process, from data preprocessing and feature engineering to model training, evaluation, and deployment. Bringing energy, technical expertise, and a collaborative spirit, I am committed to applying my knowledge effectively and delivering impactful results.

EXPERIENCE

Internship - Entrepreneurship Team   06/2021 - 08/2021
PT.Saint Technologies Indonesia

As a member of entrepreneurship team, I was tasked with managing the company's online store, generating content ideas for product marketing promotions including determining the visual concept of the content such as caption and infographic and creating articles.
